# Memory-Centric Computing

Mondays, 14-16h

Winter Semester 2025/2026

In this course, you will delve deeper into the world of memory-centric computing, driving the next wave of innovation. With cutting-edge lectures and a hands-on project, you'll gain the skills to design memory architectures in classical (DRAM, SRAM) and emerging (RRAM, MRAM) technologies.

For more information about course registration and modules, please continue to check our website regularly Updates will be posted soon.
